

DIRECTIONS TO LUBRIZOL ADVANCED MATERALS

1. From Ohio Turnpike – leave turnpike at Exit 173. Turn left onto Rt. 21 at the traffic light. Proceed north on Rt. 21 (Brecksville Rd.), 1½ miles, through the 3 traffic lights at Columbia Rd., Snowville Rd. and Miller Rd./Lubrizol EMPLOYEE entrance. One block north of the second traffic light is the VISITOR entrance to Lubrizol. See ITEM 4, below, for visitor parking and check-in.
2. From I-77 Southbound – exit at Miller Rd. exit #147 (just S of Rt. 82 exit). Turn left (east) on Miller. Proceed east, ~½ mile, moving to the left lane as you approach the intersection with Rt. 21 (Brecksville Rd.). At light, turn left (north), and move into right lane. At next driveway, turn right into the Lubrizol VISITOR entrance. See ITEM 4, below, for visitor parking and check-in.
3. From I-77 Northbound – exit at Rt. 21/Ohio Turnpike exit #146. Get into the left lane and turn left at the traffic light. Go under the turnpike bridge and proceed north on Rt. 21 (Brecksville Rd.), 1½ miles, through the 4 traffic lights at the turnpike entrance (just as you go under the bridge), Columbia Rd., Snowville Rd. and Miller Rd./Lubrizol EMPLOYEE entrance. One block north of the second traffic light is the VISITOR entrance to Lubrizol. See ITEM 4, below, for Lubrizol visitor parking and check-in.
4. **SIGNS WILL BE POSTED DIRECTING YOU TO EVENT PARKING AND EVENT CHECK-IN!** After entering the Lubrizol drive, bear left at the first fork, then make an immediate right into the R&D Visitors Parking area in front of the Research (B) building (glass front with terraced gardens and curving sidewalk). You may park anywhere in that area. If that lot is full, go back to the fork, turn left, and then turn right into the lot in front of the Services (S) building (one-story tan with flat roof) and park in the visitors' spots there. In either case, proceed to front vestibule of B building and check in with the Lubrizol host, who will provide you with a visitor's badge and escort you to the meeting area. Do not go to the new building that is the furthest north; that is the Lubrizol Advanced Materials Headquarters Building.
