Dinner will be \$20 for members, \$25 for non-members and \$5 for student members, \$10 for student non-members. Preregistration is available at www.msneo.org, or registration and payment at the door will also be available please make reservation ahead.

Next Planned Meetings into 2013

2013 Feb 20 – Has not been finalized but is planned to take place at Case Western Reserve university and will revolve around spectroscopy topics (EDS Si Drift detectors, and Electron Energy Loss Spectroscopy in bio). The local spectroscopy society is planning to join us for this meeting.

2013 May 15 – Will be held at John Carroll University partnering with SAS/ACS/AVS in a similar format to the previous two years: One main talk and then split to 3 parallel sessions. You are invited to let me know as soon as you can regarding to talks and posters you wish to present at this meeting.

In addition we have opened a [web group page on LinkedIn \(MSNO\)](#). Some of you have already found out and signed up. The idea there is to do something similar to the microscopy list server but on a smaller scale, local, and taking advantage of the linkedin format structure. Please help us with this endeavor by encouraging local contacts you have to join in to discuss microscopy and spectroscopy related questions. We hope this will enable everyone follow up on the local activity. If you have any information you wish to post regarding local workshops webinars you are well come to post it there.
